

Job Title: Front-End Web Intern

Posting: 39

Wage: Unpaid

Hours per week: Part-time – Schedule to Be Determined

Location: Seattle, Washington

The e-gov team at Washington Technology Solutions is looking for someone who shares our values in making a difference in people’s lives. We are searching for an intern who is interested in using knowledge and skills in advancing our human centered and inclusive design to help our team as we partner with other agencies to build Washington Business Hub. A background in user experience design, a letter of recommendation from a current instructor, along with possessing a self-starter, can-do attitude will distinguish the right candidate. You’ll be matched with an experienced design engineer to mentor and provide you with feedback on projects.

About e-gov

e-gov, a division of WaTech, is transforming government from the inside out by demonstrating we can work differently for citizens to solve complex problems. We are an agile development organization that practices such things like Lean Startup, customer driven design, Scrum, and self-organization/self-management. With this opportunity, you will gain valuable insight on how an agile organization delivers working software in a complex systems environment.

About you

You enjoy working in a fun, playful atmosphere and using your interest and skills in contemporary technologies to create compelling user interfaces. You are looking for real-world experience to complement your existing skills and abilities. You’ve a passion and interest for building interfaces that have worked in prototype and you’ve been recognized for being good at what you do. You like solving activity centered interaction problems!

The types of things we are doing:

- Human centered design
- Inclusive design & accessibility
- Creating prototypes, wireframes and napkin drawings
- Miscellaneous engineering to support the project
- Supporting app development with front-end knowledge

Skills we really need:

When it comes to this position what we'll value are people wanting to learn many domains to add to our current team:

- An interest in web architecture
- Front-end technologies like HTML5, CSS, JavaScript etc. and frameworks
- An understanding of UX testing
- A drive to create things that **work**
- Curiosity about business ownership and entrepreneurship

Qualifications:

This internship opportunity is open to students of accredited colleges who have completed their freshman year or students currently enrolled in a vocational program in the information technology field. Opportunities are also available for participants in WorkFirst, Cybersecurity Training Program for Veterans, or Veterans Fellowship program.

Must pass a State of Washington employment background check

Application Procedure: Please submit your resume to internships@watech.wa.gov , or your Co-Op office for forwarding
